## Humanities Camp:

Explore, Engage, Enjoy with Humanities Camp!  
Humanities Camp offers students the opportunity to engage in interactive, hands-on experiences, exploring traditional art, stories, games, and food from cultures around the world. Students will use technology and their own creativity to design cultural experiences for their peers. Join us as we design a race around the world!

## STEM camp:

Innovation. Invention. Creativity. Fun.  
These four words tell you everything you need to know about our upcoming STEM Camp for Belton ISD. Your students will be asked to help us solve everyday school problems in new and exciting ways using exciting technology such as robots and Legos and even old school cardboard. Coding and engineering will be the leading high-paying jobs of the future. Give your students an opportunity to engage in learning in a fresh, new way!
